Update for our Clients

The Health Authority has decided that at the present time your Home Support Workers will need to wear **medical masks** during their shift for your protection. At this time clients are not being asked to wear a mask, just the worker.

Masks will need to be worn for the duration of the shift, when the Home Support Worker is in close contact with you. The Home Support Worker may remove the mask when they are not in close contact with clients or other people in the home to eat, drink, etc. This is a brand new undertaking and it may take us a few days to get supplies to all of our staff.

We appreciate your understanding and patience during this time. We ask that you continue to limit visitors to your home and continue to follow the guidelines set out by the province. As always if you have questions or concerns please don't hesitate to contact our office.
